Project Overview

What is “Duke Street *In Motion*”?

Duke Street *IN MOTION* is a project focused on ensuring that **transit improvements** in the Duke Street corridor, from Landmark Mall to the King Street Metro Station, provide efficient transportation options that align with all users’ needs, wants, and expectations.

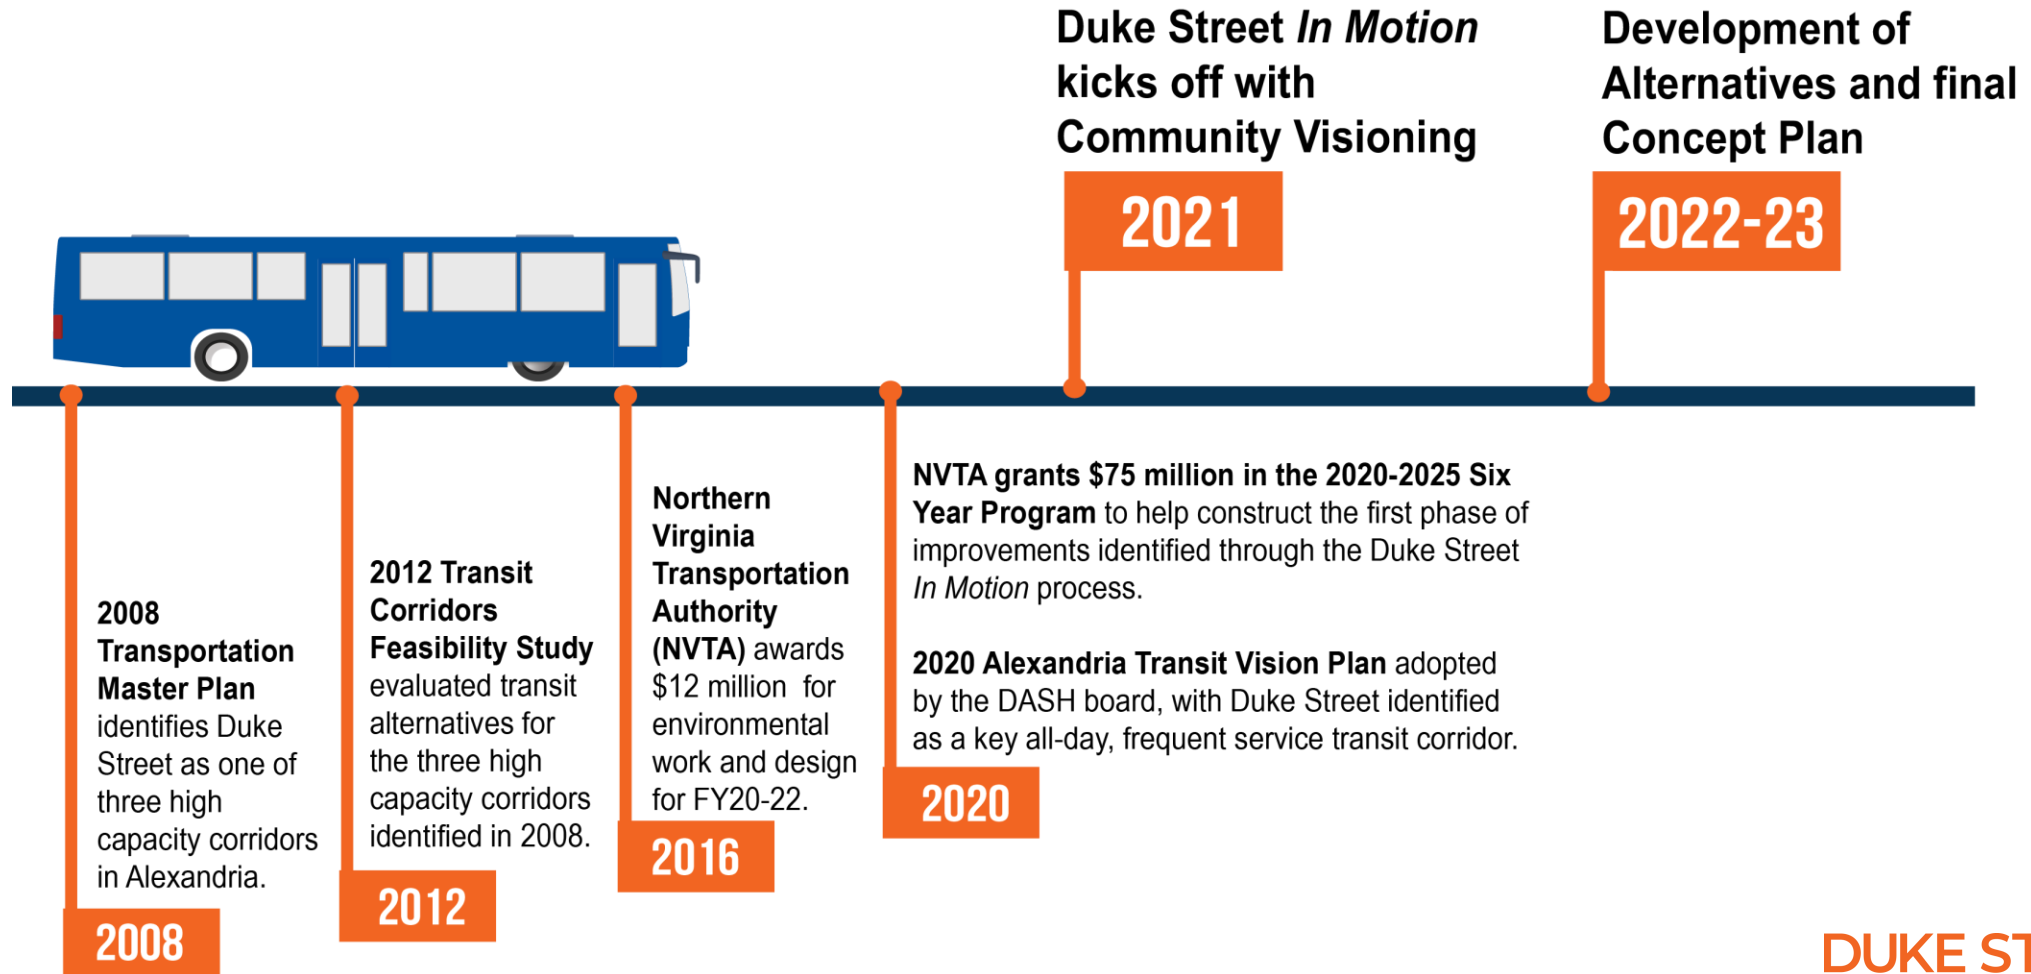

Duke Street in Motion Process

Project Purpose & Background

- Pursue high-capacity transit to achieve City sustainability and equity goals
- Reconsider concept plans in context of 2021 community visioning

What is Bus Rapid Transit (BRT)?

Buses that run more like trains

Project Vision

This project will provide an **efficient and desirable bus rapid transit (BRT) option** along Duke Street **by improving the transit experience** for current and potential riders.

With multimodal enhancements to the corridor, Duke Street will become a **safe, efficient, and desirable community connector** for people riding the **bus, walking, biking, and driving.**

Project Guiding Principles

Convenient

Make bus travel more predictable, frequent, and comfortable

Efficient

Improve mobility for all Duke Street travelers

Equitable

Use enhanced bus transit to support equitable access for a diversity of people and places

Safe

Ensure safety and accessibility for those connecting to and riding the bus, as well as other travelers

Vibrant

Create and enhance thriving and future corridor destinations that improve resident quality of life and boost the local economy

Sustainable

Contribute positively to the environment, now and in the future

Why Bus Rapid Transit on Duke Street?

Why BRT on Duke Street?

Greenhouse gas emissions

Air quality

Equity

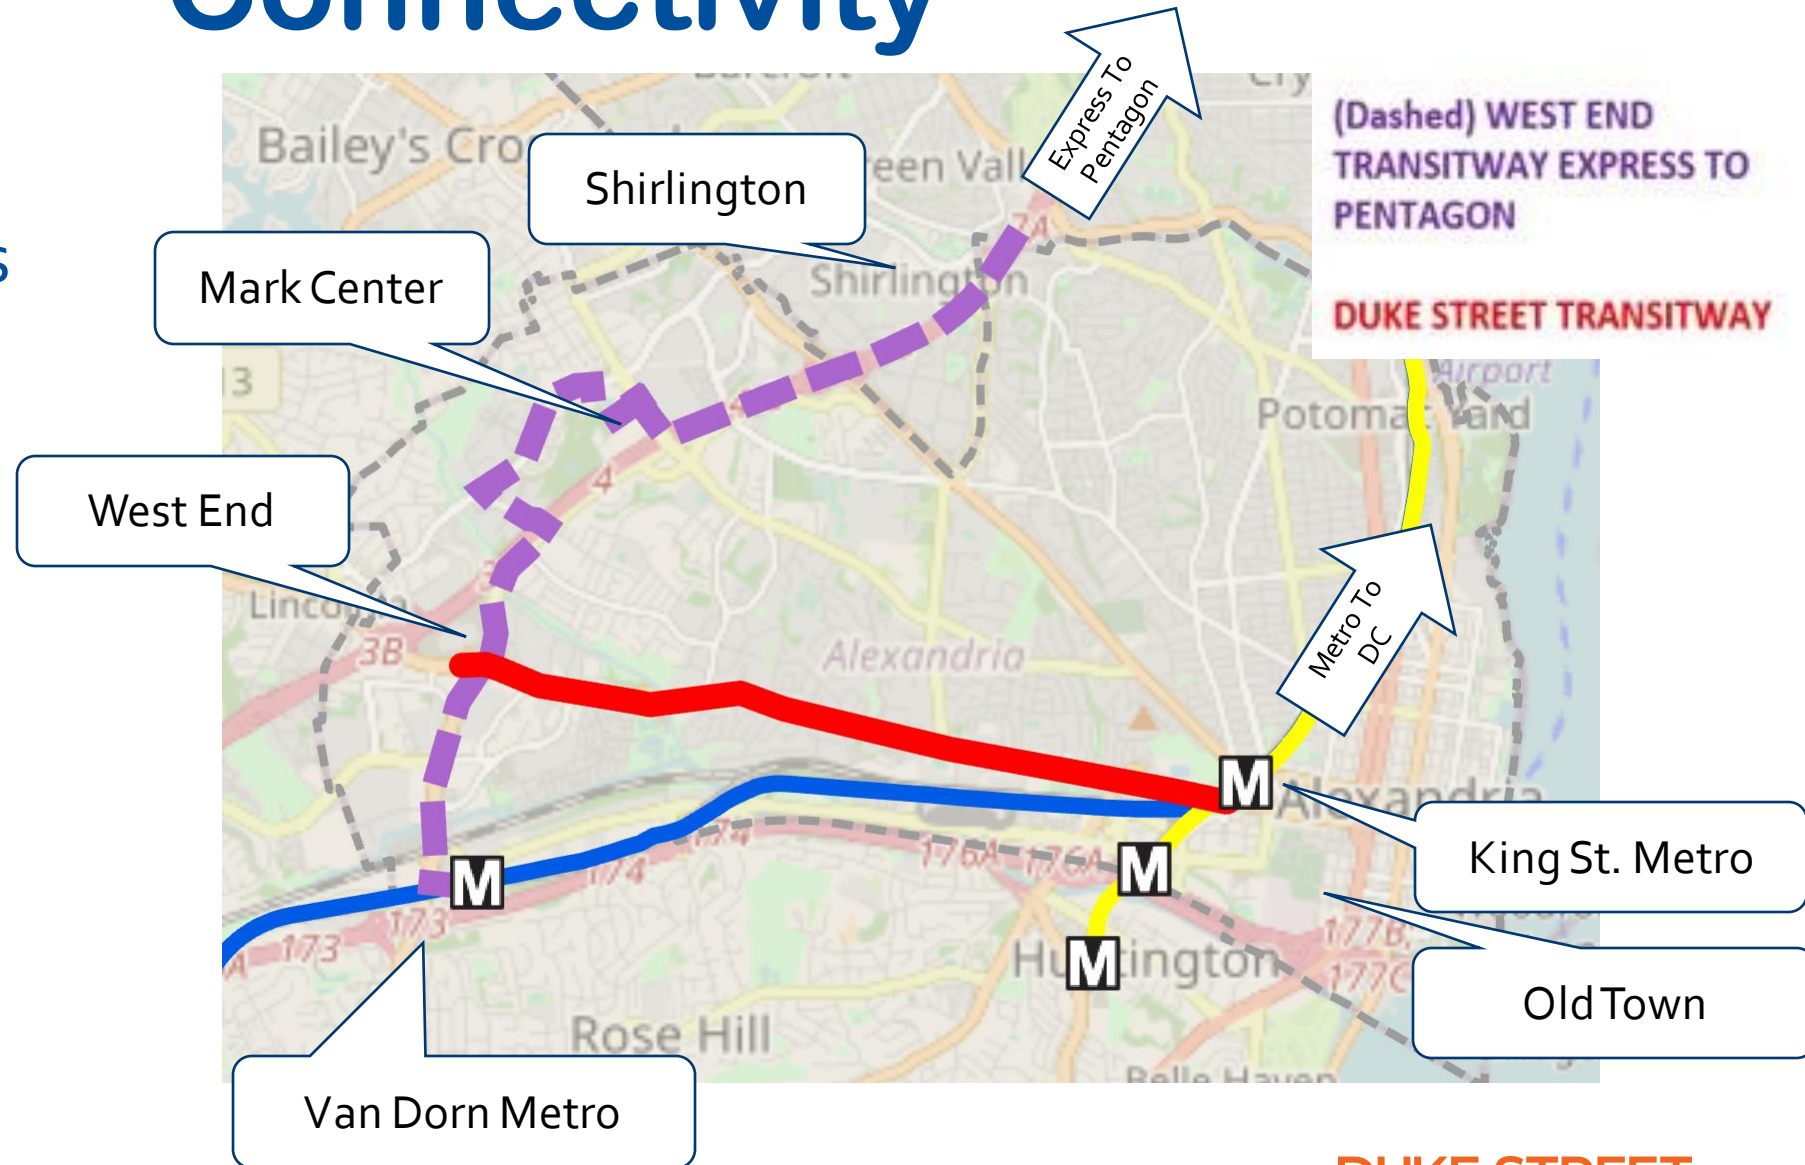

Choices

Congestion management

Connectivity

High frequency transit connections to major activity centers

Bus Travel Time vs. Vehicle Travel Time

West End Alexandria to King Street Metro Station

23-24 minutes in the peak

12-13 minutes in the peak

Half the time!

Placemaking and Livability

Segment 3 Overview

Corridor Segments

SEGMENT 1 - West End Alexandria to Jordan

SEGMENT 2A - Jordan to Wheeler

**SEGMENT 2B
Wheeler to Roth**

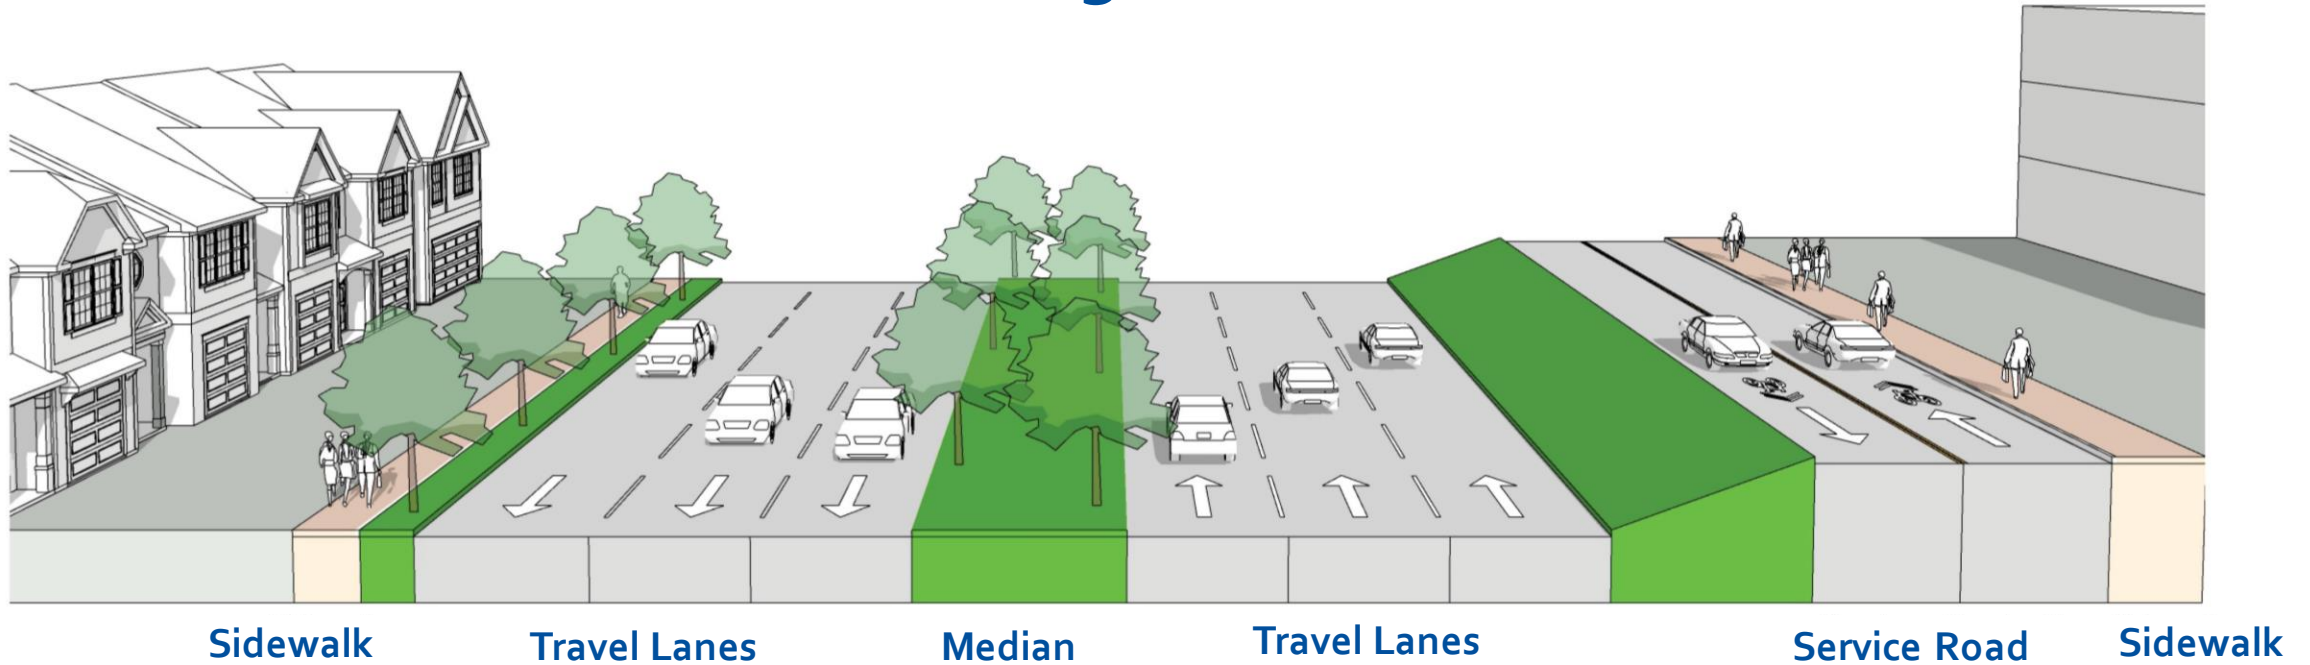

SEGMENT 3 - Roth to King St Metro Station

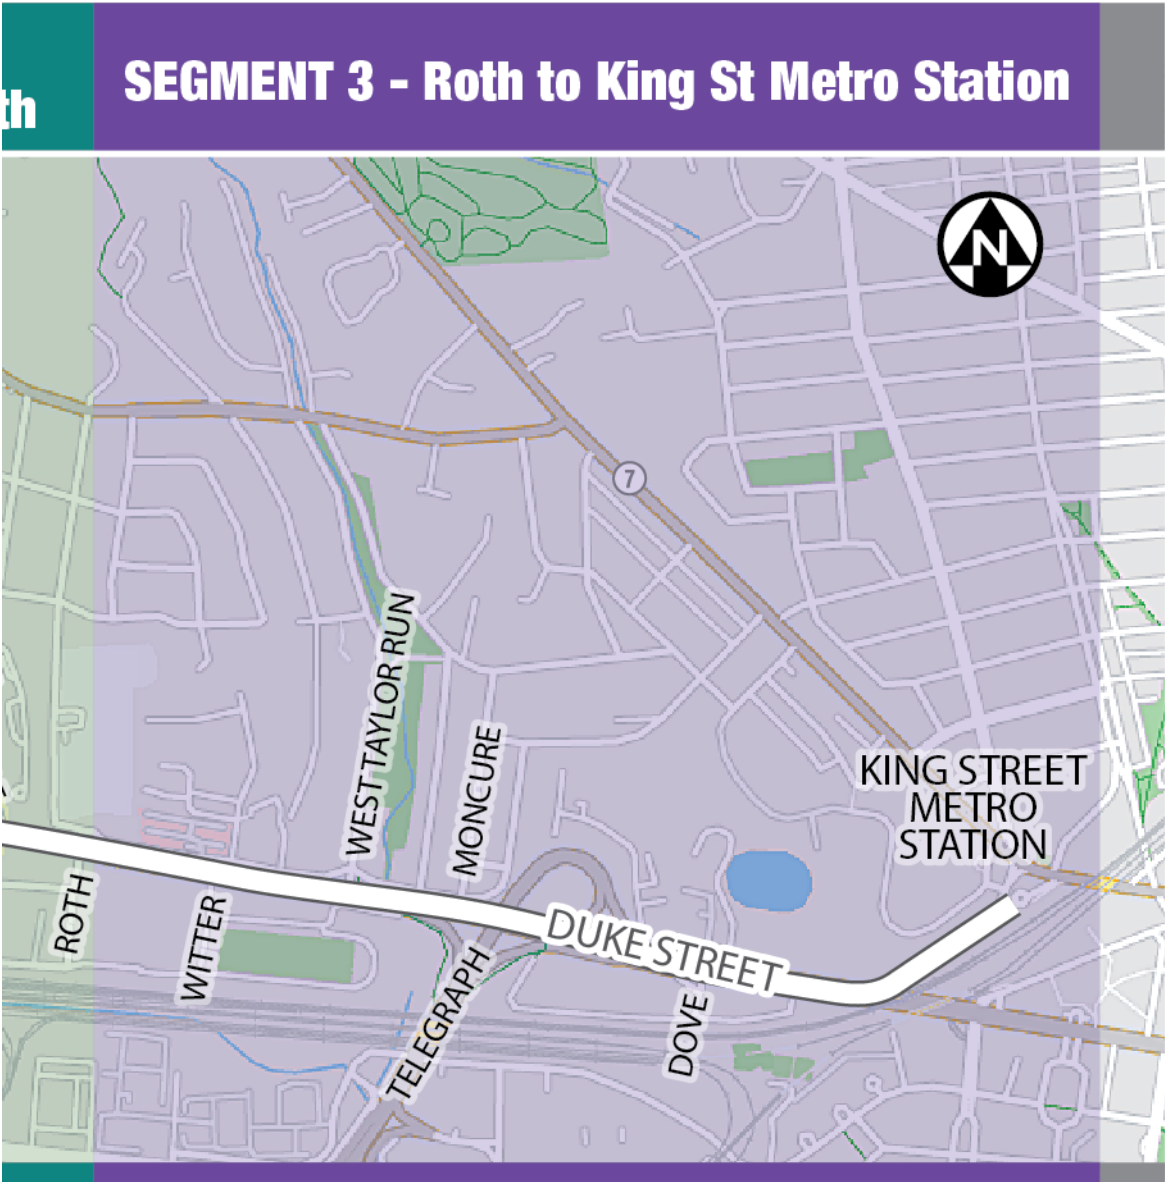

Segment 3: Roth Street to King Street Metro

Duke Street between W. Taylor Run and Witter Drive
(looking west)

Segment 3: Roth Street to King Street Metro

Segment 3 Concepts

Street Design Concepts

Busway *and* Curb Features

Step 1: Busway

Step 2: Curb features

Bus Improvements Can Take Different Forms

Center Running

Curb Running

Bidirectional Lane

Mixed Traffic

A BRT can mix different treatments to make bus service faster and more reliable

Concept Summary

SEGMENT 1 - West End Alexandria to Jordan

Segment 1

- Center running
- Curb running
- Mixed traffic

SEGMENT 2A – Jordan to Wheeler

Segment 2A

- Center running
- Hybrid
- Mixed traffic

SEGMENT 2B Wheeler to Roth

Segment 2B

- Center running
- Bidirectional
- Mixed traffic

SEGMENT 3 - Roth to King St Metro Station

Segment 3

- Center running
- Curb running
- Mixed traffic

Segment 3: Center Running

***Curb Features**

**EB Travel
Lanes**

BRT Lanes

Median

**WB Travel
Lanes**

***Curb Features**

Benefits

- Best bus reliability, speed, and rider experience
- Separates bus and general traffic
- Shorter crossings to bus

Trade Offs

- Potential increase in vehicle travel time

*Curb features to be determined at a later stage in the project.

Segment 3: Center Running

LEGEND

	BRT Station
	Bus-only Lanes
	Landscaping/Buffer
	Curb Features*

*Curb features to be determined at a later stage in the project.

Segment 3: Curb Running

***Curb Features**

**EB Travel
Lanes**

Median

**WB Travel
Lanes**

**BRT
Lane**

***Curb Features**

Benefits

- Improved bus reliability, speed, and rider experience
- Separates bus from most westbound vehicle traffic

Trade Offs

- Potential increase in vehicle travel time (westbound)

*Curb features to be determined at a later stage in the project.

Segment 3: Curb Running

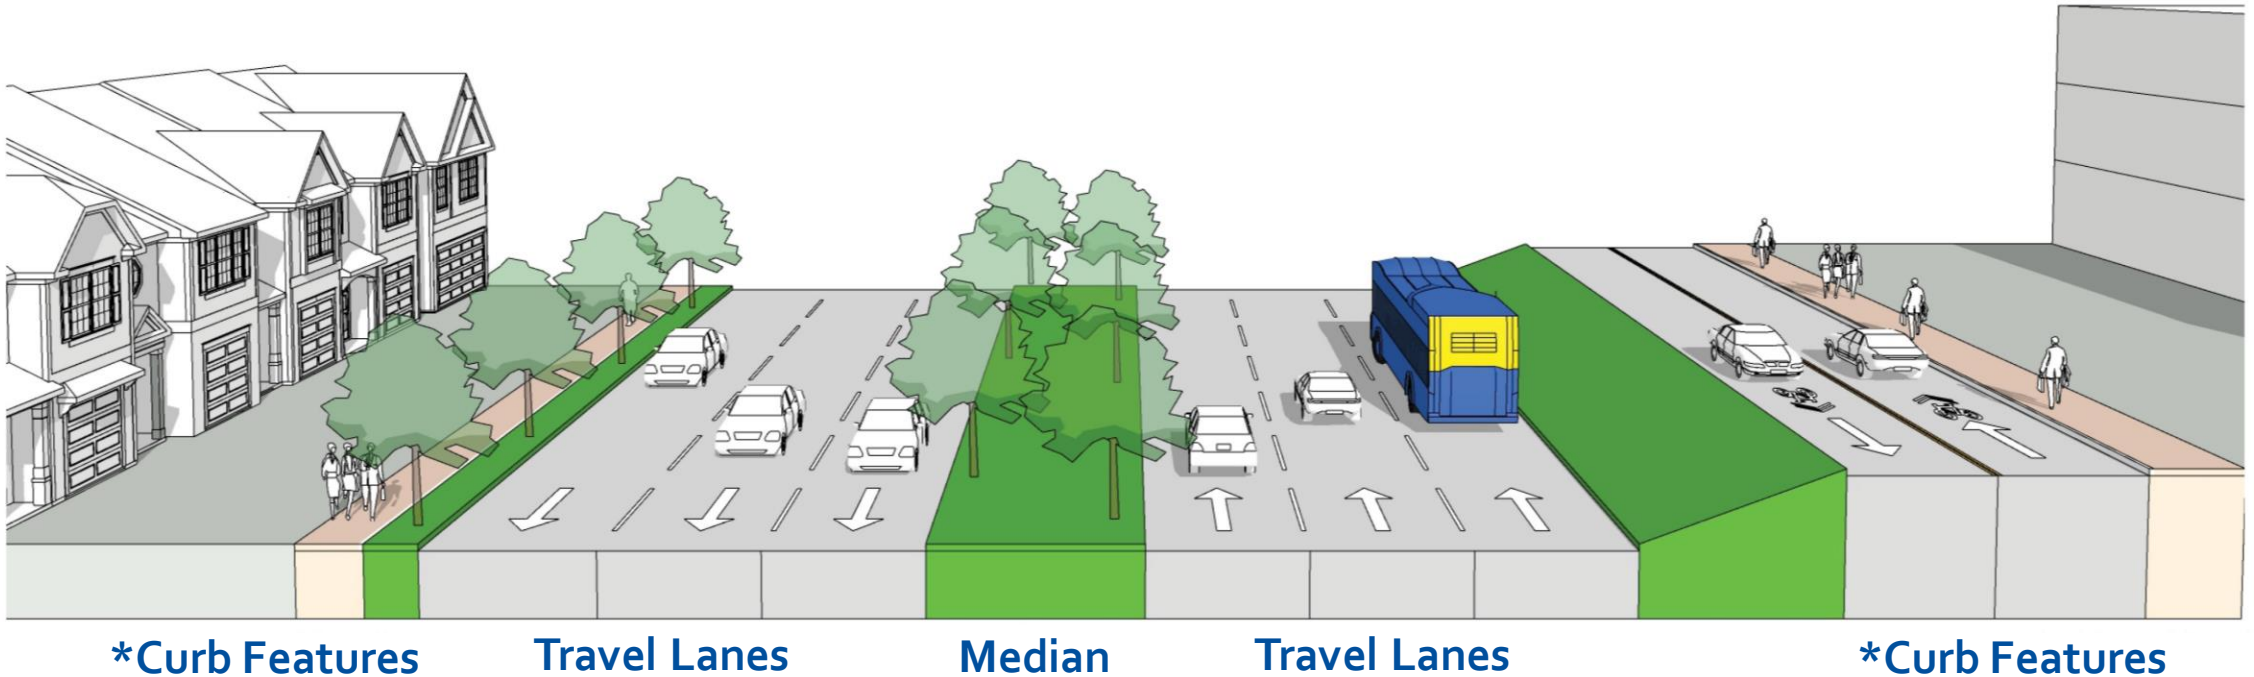

LEGEND

	BRT Station
	Bus and Turn Lane
	Landscaping/Buffer
	Curb Features*

*Curb features to be determined at a later stage in the project.

Segment 3: Mixed Traffic

Benefits

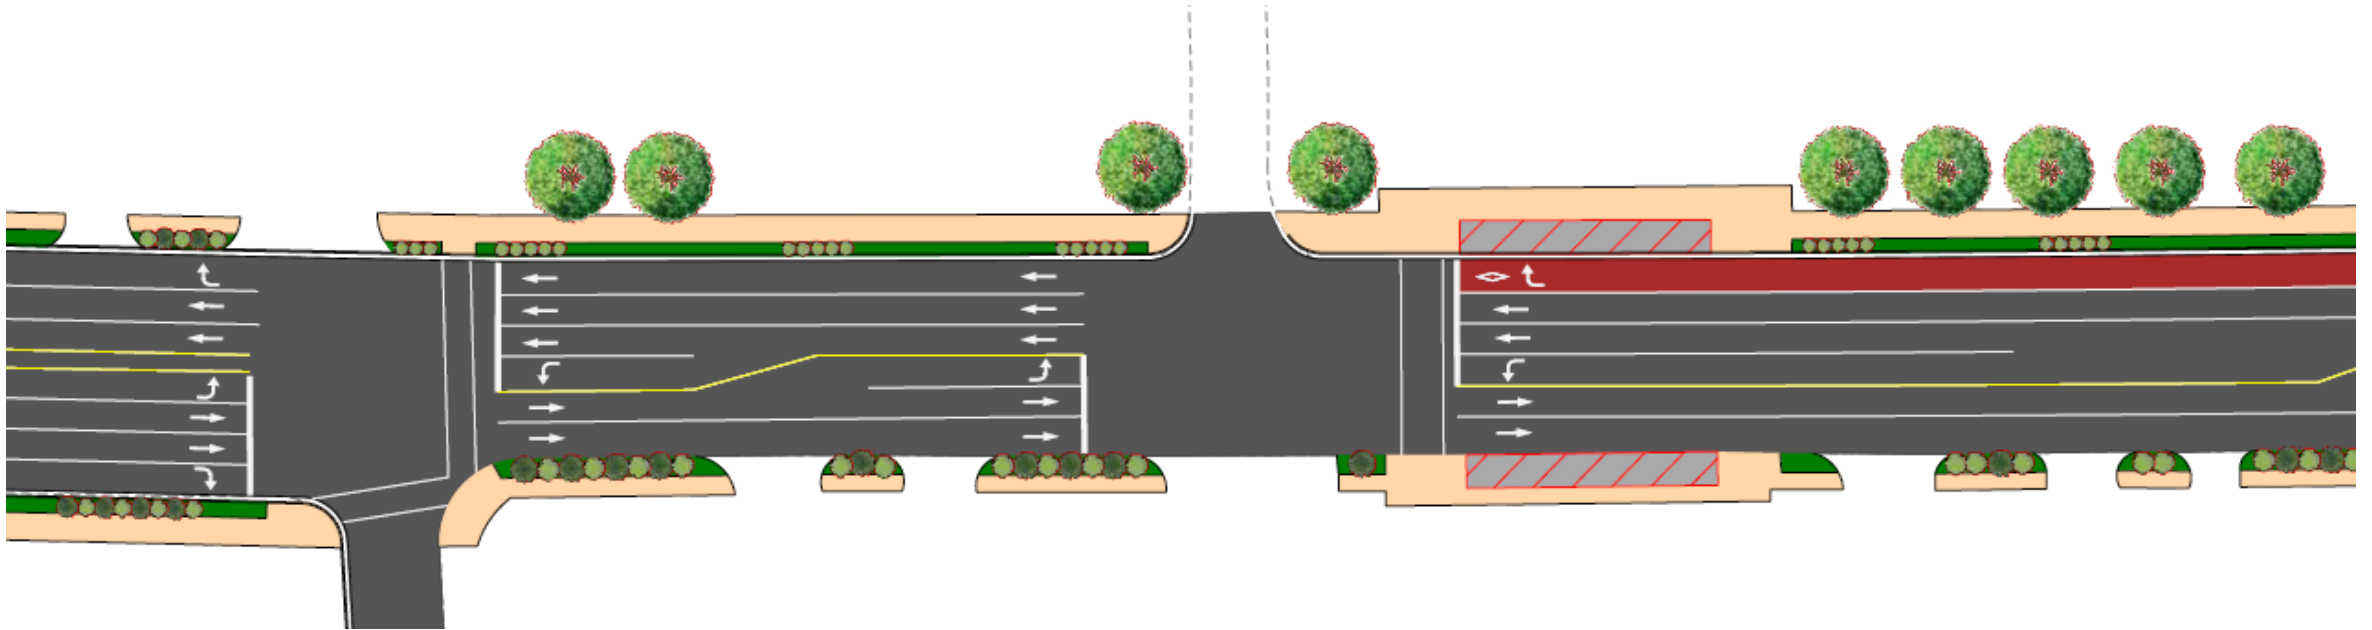

- Some improved bus reliability and bus rider experience due to transit signal priority and queue jumps
- Spot improvements to vehicle safety

Trade Offs

- Limited/reduced improvement to bus operation and reliability
- Limited improvements to vehicle safety

*Curb features to be determined at a later stage in the project.

Segment 3: Mixed Traffic

LEGEND

BRT Station

Bus-only Lanes (Queue Jump)

Landscaping/Buffer

Curb Features*

*Curb features to be determined at a later stage in the project.

Concept Summary

SEGMENT 1 - West End Alexandria to Jordan

Segment 1

- Center running
- Curb running
- Mixed traffic

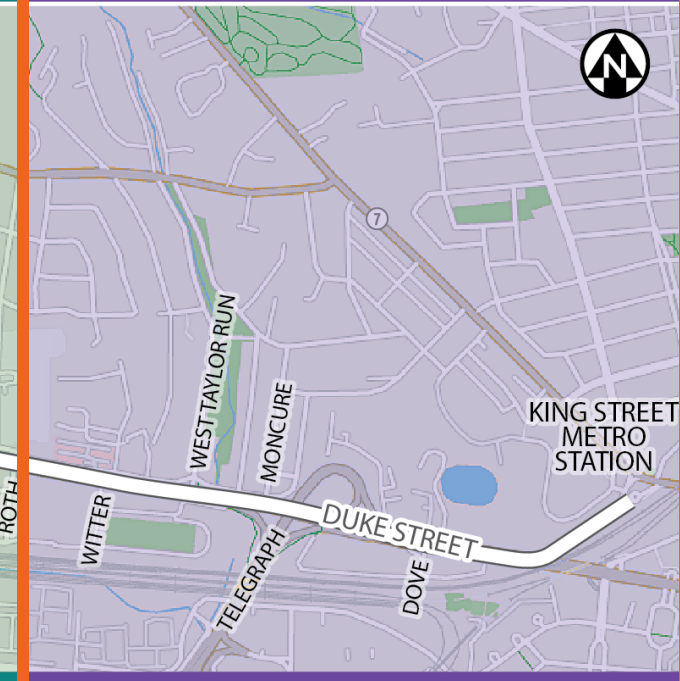

SEGMENT 2A – Jordan to Wheeler

Segment 2A

- Center running
- Hybrid
- Mixed traffic

SEGMENT 2B Wheeler to Roth

Segment 2B

- Center running
- Bidirectional
- Mixed traffic

SEGMENT 3 - Roth to King St Metro Station

Segment 3

- Center running
- Curb running
- Mixed traffic
